—Formal and Informal." This was followed by a demonstration by Geraldine Mortimer and Luann Eslinger on "Color and Color Schemes." The girls handed in their finished shoe bags. They then returned to the Jointed Meeting.

On Wednesday, March 20, Shirley Schuler was the hostess for the 4-H Girls' Club. Miss Nancy Pasashnik, Jr. Supervisor of 4-H Club Activities was present at the meeting. Marilyn Martin and Phyllis Forsch gave a demonstration on "Preparing Wood for Painting and Types of Wood to Use." Miss Pasashnik gave an interesting talk on New Fabrics, Color in Your Home, and our project work for the year. Then a delicious lunch was served.

4-H AMATEUR SHOW

On Monday, March 25, the Carbon 4-H Clubs sponsored an Amateur Show with 21 entries competing. The local judges, Mrs. S. Torrance, Mr. L. Poxon and Mr. H. Isaac did a splendid job of choosing the winners as follows:

JUNIOR

1. Douglas and Laurie Empey, Swalwell.
2. Trio — Bonnie Ohlhauser, Glenda Ohlhauser, Jennie Reid.
3. Larry Gieck, Grainger.

SENIOR

1. Ruth Empey, Swalwell.
2. Shirley Schuler.
3. Elaine and Joyce Middlestead.

COMEDY

1. Herbert and Hulda (Bob Ohlhauser and Adine Harsch).

The 4-H Annual Trophy was awarded to the Tumbling Class who performed a splendid act.

The 4-H Clubs extend congratulations to all entrants and especially the winners. A special thankyou to the judges.

The Carbon members of the Acme Chapter, Order of the Eastern Star, wish to thank all those who helped make their recent cribbage tournament a great success. The cribbage winners were as follows: 1st Event, Mr. and Mrs. Stewart Hay. 2nd Event, Mr. and Mrs. Bernard Stubbart. 3rd Event, Mr. and Mrs. Irvan McCracken. 4th Event, Mr. and Mrs. Joe Spitzig.

Hospital patients this week are Sharon Poole and Penny Nash. Penny since has returned home on Tuesday.

Mr. and Mrs. Jas. Cooper of Banff spent a couple of days at Carbon this week.

Mr. and Mrs. Ray Payne (nee Doreen Hay) is spending a couple of weeks at the home of her parents Mr. and Mrs. Walter Hay.

Mrs. C. H. Nash is spending a few weeks at the home of her daughter and son-in-law, Mr. and Mrs. E. Sellens. Mr. Sellens is not very well.

Mrs. E. MacAlpine left Monday for Sarnia, Ontario to visit her daughter and son-in-law, also to Centralia to visit her daughter and son-in-law, Mr. and Mrs. Flint. Mr. Flint is stationed with the R.C.A.F. at Centralia. Mrs. Lois Ginther is relieving while Mrs. MacAlpine is away.

Mrs. C. Graham returned on Tuesday after spending several weeks at Red Deer at the home of her daughter and son-in-law Mr. and Mrs. Henry Jerome.

The Home & School will hold a Tea on Friday, April 21 from 3:30 to 5 p.m. in the auditorium. Handicraft Table by Mrs. Miller's Room. Program. Adults 50c; Children 25c.

The Duke of York Chapter I.O.D.E. will be canvassing for the Cancer Society in the near future. All donations will be greatly appreciated.

Obituaries

John Foray passed away in the Calgary General hospital at the age of 73 years. Born in Hungary, he came to the U.S.A. and then to Carbon where he was employed in the local mines. He resided at Carbon many years, until retiring to live in Calgary, where he resided till his death.

He is survived by his wife, Mary, Calgary; two sons, Fred and Lawrence of Carbon; one daughter, Mrs. May Krebs of

Carbon; 5 grandchildren; one sister in Los Angeles, U.S.A.; one brother in Ohio, U.S.A.

Funeral services were held Wed. at 1:30 p.m. at Leydens Chapel. Rev. Wilkinson officiated. Burial followed in Queen's Park cemetery.

Drought in western U.S. called worst on record

It began in 1951 and is still going strong

By LEONARD SNYDER
(Correspondent for CPC)

Parts of the western and south-western United States are engulfed now in the worst drought on record.

The weather bureau sums up the situation this way: "The severity of the present drought has in general equalled or exceeded that of any other drought occurring in

Regions hit hardest by the drought are in black.

the same area since the beginning of precipitation records about the middle of the 19th century.

"Tree-ring data suggests that there have been no droughts of substantially greater severity in western and southwestern United

Dental college plans tabled in Legislature

Plans for a \$1,350,000 dental college that would graduate 30 dentists and 15 dental hygienists yearly with an annual operating cost of \$246,250 were contained in a report tabled last week (January 31) by the minister of education, Hon. W. C. Miller.

The report by Dr. K. J. Paynter of the University of Toronto who was appointed by the Manitoba Government to study the dental situation in the province, also recommended that post-graduate studies be included at the college. At present there is no dental college between Toronto and Edmonton.—The Carillon News, Steinbach, Man.—Feb. 8, 1957.

First telegraph wire in Africa was strung on 12-foot poles, but soon the giraffe problem caused use of higher poles.

Quick, Easy Way to Shrink Painful Piles

Here is a nice, clean, easy way to get real relief from the nagging distress of swollen, painful piles without the inconvenience of ointments, pile pipes or suppositories.

The secret is in taking just one small Hem-Roid Tablet, with water, two or three times a day. Works through effective INTERNAL action. Quickly eases constipation, relieves itching, soreness and pain. Helps shrink piles and permits them to heal.

Why suffer needlessly when Hem-Roid offers you so much. Get a package today. See for yourself how nice Hem-Roid is to use, how effective it is and how much more comfort it will quickly bring you.

All drug stores. Low cost. Money refunded if you are not 100% pleased.

States since about 1670 and perhaps not since 1570."

The current drought began in the summer of 1951 and continues to grip a vast area of the country east of the Rocky mountains from Texas to the Dakotas. Similar conditions exist over much of Arizona, New Mexico, Utah, Montana, Missouri and parts of Nevada.

Weathermen pinpoint the "core" of the drought in west-central Texas and eastern New Mexico, although most of the area west of the Mississippi river has been touched to a greater or lesser degree.

The conditions of the current drought, say meteorologists, are characteristic of recurring droughts that periodically affect arid, semi-arid and the margins of subhumid regions.

The United States has suffered three major droughts in its history—the current, one which is by far the worst, and the shorter droughts of 1934-1936 and 1892-1894.

In 1952, when the current drought began to be felt over wide areas the nationwide precipitation was the lowest since 1934. Weather bureau records show that in October of that year there were no floods reported in the entire country—for the first time since November, 1939.

The central and southern portions of the plains states continued to suffer rainfall shortages in 1953, although some relief was experienced in the northern portion of this region.

Severe dust storms swept over parts of Texas, Oklahoma and Kansas in February, 1953. By the end of June, a critical period for crops, there were large sections of the southwest which had received less than 10 percent of their normal rains for six consecutive weeks—and longer in scattered areas.

High temperatures and hot, dry winds added to the destruction. The Rio Grande river at Laredo, Tex., dried up for the first time in recorded history. In the summer of 1954 many points in the plains states suffered one of the hottest and driest spells on record.

The following year the drought pattern in the southwest persisted while, for the nation as a whole, precipitation was near normal. Continued dry weather marked the opening of 1956. January and February were both deficient in moisture over much of the southwest and March was extremely dry.

During the six months ended in March less than one inch of precipitation fell in eastern New Mexico and extreme western Texas and less than two inches in a larger area including southern Arizona, most of New Mexico and western Texas, Oklahoma, most of western and southwestern Kansas and southeastern Colorado.

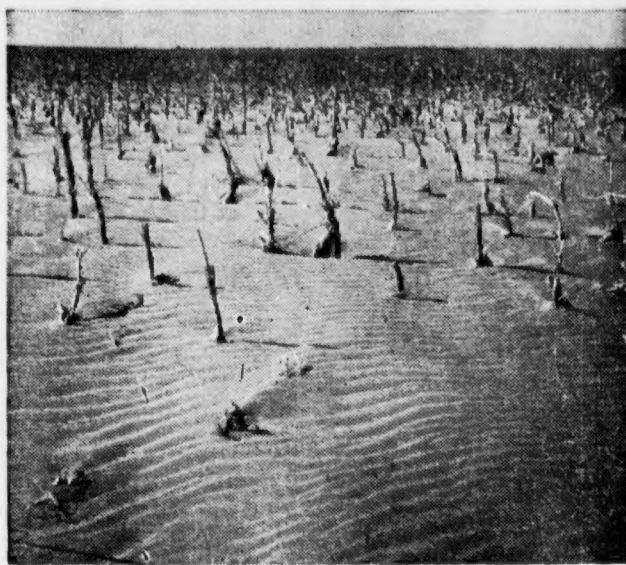

In Nebraska the topsoil was dry and powdery in the central and eastern portions.

In these areas where drought persisted the topsoil was vulnerable to wind erosion.

According to agriculture department officials nearly two million acres of land already have been damaged by wind action in the Great Plains. About one-third of this damage was in Kansas. Also, nearly 250,000 acres of wheat were seriously damaged by wind, about 80 percent of which was reported for Kansas and Colorado.

THORN LIKE STEEL

The yucca has a thorn like steel. In fertile Mexico, the plant turns into a tree with dull blade endings.

Sand takes over Colorado cornfield.

Patterns Blouse wardrobe

Add to your wardrobe with these blouses—a thrifty way to have many smart fashions for spring! Three classic styles, with clever little variations in collars and pockets. Sew them to mix and match with your favorite skirts!

Pattern 4660: Misses' Sizes 10, 12, 14, 16, 18, 20. Size 16 upper version, 2 1/4 yards 39-inch; middle 1 1/4 yards; lower 1 1/4 yards.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Norway to check up on pupils' hearing

Norway's health authorities are planning a nationwide test program to spot defective hearing in school children. A sample examination in North Troendelag revealed that 4.2 percent of the pupils were hard of hearing and neither the children themselves nor the parents nor their teachers knew it. 3238

Building hints and ideas

Finding suitable containers in which to mix small amounts of glue or paint or other materials is difficult—and often expensive if the material ruins the container. By bending up four sides of a small piece of aluminum foil, however, one gets a little leak-proof tray of any size. It does the job, then is thrown away.

Be sure all volatile and inflammable liquids like solvents, torch fuels, gasoline, etc., are stored in metal cans with non-leaking tops. Such liquids stored, heat, and burst the container. If in glass bottles may expand from a spark or open flame is near by, you may end up with a serious fire.

For a smoother, crisper cut on glass always lubricate the wheel of the glass cutter by dipping it into some kerosene or varnolene before each cut. Use a straight edge to guide you, and bear down with moderate pressure, scoring the entire line in one swift stroke.

When pouring liquids such as turpentine or shellac from square gallon cans having a spout in one corner, hold the can so that the opening or spout is at the top when the can is in pouring position. Air will be able to enter freely above the liquid giving a steady, easy-to-control stream.

The easiest way to remove a decal without damaging its surface is to cover it with a wet wash cloth and then press a hot iron over the cloth. Within a few minutes the steam will soften up the old decal, enabling easy removal. —The Herald, Hanna, Alta.

National religion

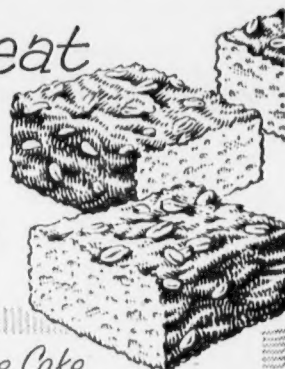

The national religion of Japan is Shintoism, which has developed from a form of nature worship. Its central doctrine is the belief that the human heart is good and pure. In the 18th century, however, State Shinto grew up. It asserted the divinity of the Emperor, who supposedly was descended from the sun goddess, Amaterasu. State Shinto was banned at the end of World War II but Sect Shinto, the older form, still thrives.—The Sun, Swift Current, Sask.—Jan. 30, 1957.

A rain forest is one in which the annual rainfall totals 100 inches or more.

More than 100,000 babies are born each year in the United States with no medical attention of any kind.

Sweet Treat

And so easy with fast-rising Fleischmann's Active Dry Yeast... a treat that will bring demands for "more, please!"

Honey Bun Coffee Cake

- In an 8-inch square cake pan, melt 3 tablespoons butter or margarine. Drizzle with 1/2 cup honey and sprinkle with 1/2 cup broken salted nuts.
- Scald 1/2 cup milk. Remove from heat and stir in 1/4 cup honey, 3/4 teaspoon salt, 1/4 cup shortening. Cool to lukewarm.
- In the meantime, measure into a large bowl 1/2 cup lukewarm water, 1 teaspoon granulated sugar

and stir until sugar is dissolved. Sprinkle with contents of 1 envelope Fleischmann's Active Dry Yeast. Let stand 10 minutes, THEN stir well. Stir the lukewarm milk mixture and 1 well-beaten egg 1/2 teaspoon vanilla into the yeast mixture. Sift together once 2 cups once-sifted all-purpose flour, 3/4 teaspoon ground cinnamon. Sift dry ingredients into yeast mixture and stir until well blended—about 1 minute.

4. Spoon mixture into prepared cake pan. Cover. Let rise in a warm place, free from draft, until doubled in bulk—about 1 1/4 hours. Bake in a moderately hot oven, 375°, about 35 minutes. Turn out of pan immediately. Serve warm.

Needs no refrigeration

You'll find my CHERRY DUMPLINGS easy to make!

Turn out into broad saucepan or electric frypan
1 can (approx. 15 ounces) cherries and syrup
Add and stir until sugar is dissolved
1/2 cup granulated sugar
1/2 cup water
Cover and bring just to boiling point.

Meantime, sift together into a bowl
1 1/4 cups once-sifted pastry flour or 1 1/4 cups once-sifted all-purpose flour
2 1/2 teaspoons Magic Baking Powder
1/2 teaspoon salt
2 tablespoons granulated sugar
Cut in finely
2 tablespoons chilled shortening
Mix in
1/2 teaspoon grated orange rind

Make a well in dry ingredients and add
1/2 cup milk
and mix lightly with a fork, adding more milk, if necessary, to make a drop dough. Drop by large spoonfuls over cherries. Cover and simmer 15 minutes, without lifting lid. Serve immediately. Yield: 4 or 5 servings.

Guard against failures... use dependable MAGIC Baking Powder. MAGIC protects all your ingredients, gives you light, tender baked goods. Buy MAGIC today!

Canadian statistics report

(A Weekly Review)

International Trade: Commodity imports and exports both rose to new record values last year, imports soaring nearly a billion dollars or more than 21 percent over the previous 1955 record value and exports rising over a half-billion dollars or nearly 12 percent. Import and export trade expanded with all main areas, although dollar gains for each were largest with the United States . . . November trade in outstanding securities with other countries produced a sales balance of nearly \$19,000,000, making an 11-month total of \$245,000,000. This comprised \$88,000,000 with the United States, \$81,000,000 with the United Kingdom, and \$76,000,000 with other overseas countries.

Population: All but 36 of the 263 federal electoral ridings had larger populations in June last year than the same areas in 1951. Sixty-four had increases of 20 percent or more, the largest amounting to 132 percent, and 69 had increases between 10 percent and 19 percent. Only two of the 36 with decreases lost more than 10 percent of their 1951 population . . . Births in Canada last year totalled 450,500, the largest number on record, but the birth rate was only the fourth highest. Deaths were also at a new high of 132,700, the preliminary estimate indicating a slight rise in the rate from the record low of the two previous years.

Prices: The consumer price index eased slightly downward during December, decreases in food and clothing outweighing increases in shelter, household operation and other commodities and services . . . On the other hand, the general wholesale price index moved upward in the month, with increases in each of eight main groups except wood products. At its December level this index was 3 percent above a year earlier.

Housing: New residential units completed last year reached a record total of 135,700, an increase of 6 percent over 1955. On the other hand, the number of units started fell 8 percent to 127,311 and the number under construction at the year's end was down almost 14 percent at 68,579.

Labour: Per capita weekly wages and salaries in industry reached a new high average figure of \$66.22 at November 1, 15c higher than a month earlier and \$4.25 above the average at November 1, 1955. The industrial employment and the weekly payrolls indexes were also at new peaks at November 1.

Cheerio club history covers 22 active years

The Cheerio Club was formed on March 14th, 1935, to work in conjunction with the Senior W.A. of the Church, in Rocanville, Sask.

Much work has been done by this Junior Club, the first project being the piano, purchased in the first year. The chimes were dedicated to those of World War II. Many other small projects have been undertaken, but too numerous to mention. In the past year we are proud to have placed in the church the electric organ.—The World-Spectator, Moosomin, Sask.—Feb. 6, 1957.

Last building moved out of Bannerman

Bannerman, that once-thriving metropolis near the border is no more. Its last business building was moved out of there this week, when John Friesen, local building mover placed it on timbers and headed for Lena.

The building, the former G. N. railway station, which until recently was the Bannerman store, has been purchased by J. S. Atchison at Lena, who will set it on a foundation adjacent to the highway. It will be used as a store and quarters, replacing the building lost by fire several weeks ago.—The Guide, Killarney, Man.—Feb. 7, 1957.

The hair of men working with copper and brass has been known to turn green. 2238

Fundy National Park

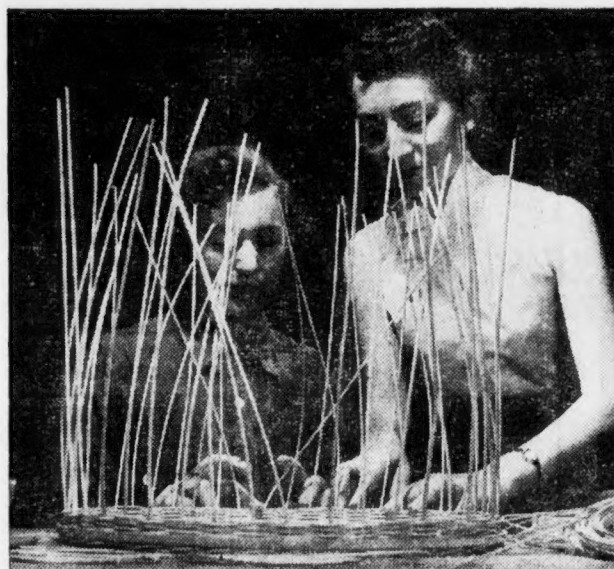

Art Under the Sun

All instruction is individual. Norma Rousler, a visitor from New Jersey, receives some help with the vanity stool she is making.

Age is a small factor in mastering a craft and there's no such thing as a craft men can do better than women. Last year the best wood turner was a lovely young lady.

Students may join for one day at a time whenever they happen to arrive, stay for as long as they wish. Many of them return yearly to the beautiful holiday resort.

Whole families often come to the school. Fees are modest: one dollar a day per course plus the cost of the materials used.

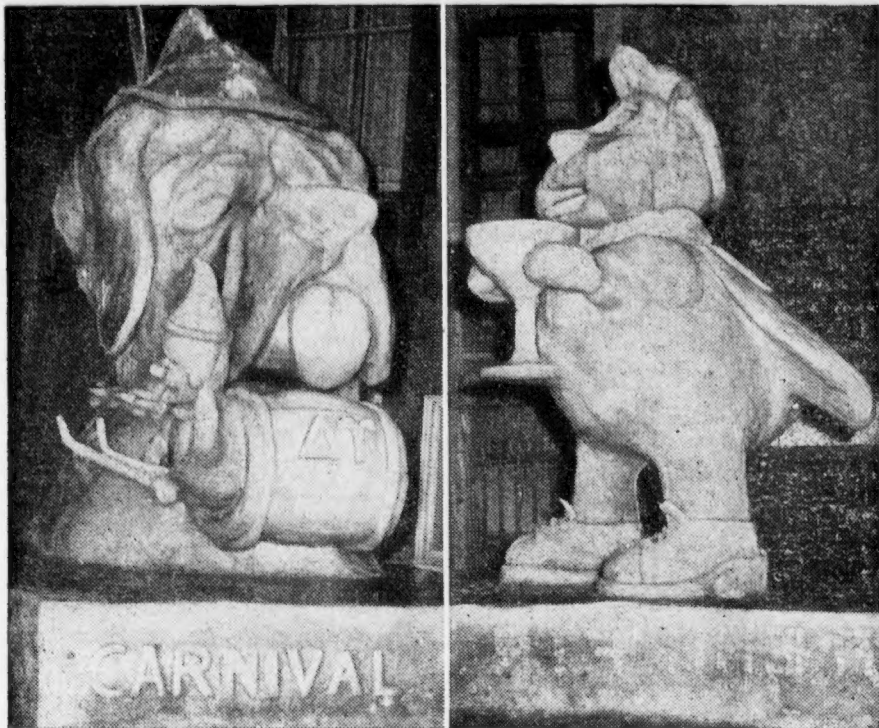

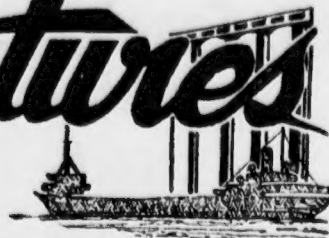

The New Brunswick School of Arts and Crafts is unlike any other summer school in North America. It requires no registration, has no schedule of classes, no timetable, yet it cannot accommodate all who wish to enter. Above,

Rev. Ralph Hinkle, retired minister from Inglewood, California, is shown how to weave a rug by instructress Asta Onno.

National Film Board of Canada Photos by Chris Lund.

Canadian Weekly Features

THIRD STRAIGHT WIN—Delta Upsilon Fraternity won the annual McGill University snow-sculpture contest for the third straight time by defeating 17 men's fraternities. The St. Bernard dog's head is complete with traditional keg around its neck. Another prize in the Winter Carnival feature went to Sigma Chi's Firefly, which kept flashing snow off its tail light.

CALL ME FOR DINNER, JAMES—Too, too bored by the whole thing is Pilgrim's TV Victor, a blasé bulldog, shown napping during the Club Show. With his Ivy League cap at a rakish angle, Victor awaits his owner, Albert Poholek.

KNOTTY PROBLEM — Patrolman Don Murphy finds this totem pole a close-mouthed witness. After hauling in the 8-foot, 400-pound wooden sculpture, thought to have been abandoned, police were informed by a woman that it was intended for her garden but had been delayed in transit.

PANCAKE TROUBLE—To celebrate Shrove Tuesday this youngster thought he would practice the pancake flip. He managed to get a pancake into the air without trouble but it just wouldn't drop into the pan. Oh, well, it makes a cute hat.

GOOD HEAD — Three youngsters put their heads together with a giant papier-mache funny man in Viareggio, Italy. The huge head was used in the town's pre-Lenten carnival, which was held preceding Ash Wednesday, March 6.

"ELECOM 125"—Model Nancy Dolen, 23, holds tape from "Elecom 125" an electronic computer which predicted the measurements of the ideal Miss America of 1970. Nancy, who measures up to the 1970 Miss America is 13 years ahead of her time. Vital statistics turned out by the computer forecast Miss America's height, five feet seven and a half inches; weight, 120 pounds; bust, 35½ inches; waist, 24 inches; and hips 35½ inches.

IN DRINKING WE WILL GRADUATE—This is a class run at the Seibel Institute of Technology, a school where students spend a good deal of the time testing beer—they're learning to be brewmasters. Instructor checks a model vat.

THEY'LL KNOW BETTER BY JULY—Baseball managers Freddie Hutchinson of the St. Louis Cardinals, left, and Mayo Smith of the Philadelphia Phillies are already deeply concerned with the pre-season problems while the rest of the nation is just beginning to envision a summer of diamond pleasure. Clearwater, Fla., is the site and this year's rookie crop the object of their careful scrutiny.

A silkworm spins its cocoon—
from 2,000 to 3,000 feet of filament
—in 72 hours.

Here's the Answer

Funny and Otherwise

A drunk was wobbling along the street when he walked into a telephone pole. Feeling the pole up and down he started working his way around it until he had made a complete circle back to where he started. Then he sat dejectedly down on the sidewalk.

"No use," he said resignedly. "I'm fenced in."

The job application form included a question, "Have you ever been arrested?" On the following line, for the benefit of those whose answer was "Yes," was the question "Why?"

One applicant answered the first question, "No" and, after the second, wrote "Never got caught."

"What would you do if you had had five dates with a man and he had never attempted to kiss you?" asked one coed of another.

"I'd lie about it," was the prompt reply.

A lawyer travelled to Regina for an important case, promising to wire his partner the moment a decision was announced. At long last the wire came, and it read "Justice has triumphed." The partner wired back: "Appeal at once."

Hubby sneaked home in the fading hours of the dawn to find his spouse right there at the front door to greet him. "Well," she snorted. "So you've decided that home is the best place after all!"

"I don't know about that," he replied. "But it's the only place open."

A boy's voice changes when he becomes a man, and a girl's voice changes when she becomes a wife.

LARGEST FOREST FIRE

Largest known forest fire was the one which swept over 3,000,000 acres and caused the loss of 160 lives in Maine and New Brunswick in 1825.

One pretty dress with two fashion looks

This charming apple blossom dress with ladylike button-on apron is made from a versatile Anne Adams Printed Pattern that every mother should have in her pattern collection.

The little girl's dress pattern comes with two sleeve versions and also a low or high neckline. It can be used to make a sun dress or a Sunday dress, a school dress or a party frock. Because directions for laying out the pattern on fabric, cutting and sewing the dress are printed on pattern parts, sewing is easy as can be. For the dress, shown above, our Pattern Designer chose a pretty pink print in Bates Corazelle combined cotton woven with Avisco rayon. She made the apron of solid pink Corazelle and trimmed it with pink rick-rack and matching pearl buttons. This fabric launders nicely, stays fresh and new looking too.

Our Printed Pattern 4717 comes in Children's Sizes 2, 4, 6, 8 and 10. Size 6 dress with high neck and sleeves requires 1 3/4 yards of 45-inch Corazelle, and the apron requires 1 1/4 yards.

Send Thirty-five cents in coins for Printed Pattern 4717. Send to:

Anne Adams Pattern Dept.,
Department P.P.L.,

60 Front Street W., Toronto

Be sure to write plainly your Name, Address and Pattern Number.

(An official department of the Canadian Amateur Sport and Physical Fitness Development Service)

By Lloyd Percival

Are women fitter than men?

According to information collected by Sports College during a national study of fitness completed in 1956, women definitely appear to be fitter than men in Canada.

Tests have shown that she is considerably fitter than the average male until she reaches her 40's. Then her fitness level begins to recede.

The reason for the difference appears to be that the average woman gets more exercise. While the husband is sitting at a desk or driving a car, she is polishing floors, washing, walking up and down stairs, walking to the store, keeping track of the children and all the other many chores common to the housewife.

After the age of 40, however, her physical activity begins to drop. Her children are grown up and are helping around the house; the husband has increased his income and provided mechanical devices which make her physical load lighter, and perhaps she even hires some domestic help. Whereas she used to walk to the shopping center, she now has her own little car to move about in.

The fact that women generally do get more exercise, however, may be one reason why fewer women suffer from heart disease than men.

Is boxing a good fitness developer?

We are occasionally asked if boxing is a good sport for youngsters to develop their fitness and strength.

The answer to this one, as far as we are concerned, is no. Although we do recommend that every boy should learn how to box sufficiently well to take care of himself and destroy any fear of combat, we do not recommend it as a regular activity.

Of all the personal combat sports, wrestling is by far the best. Though it builds the body

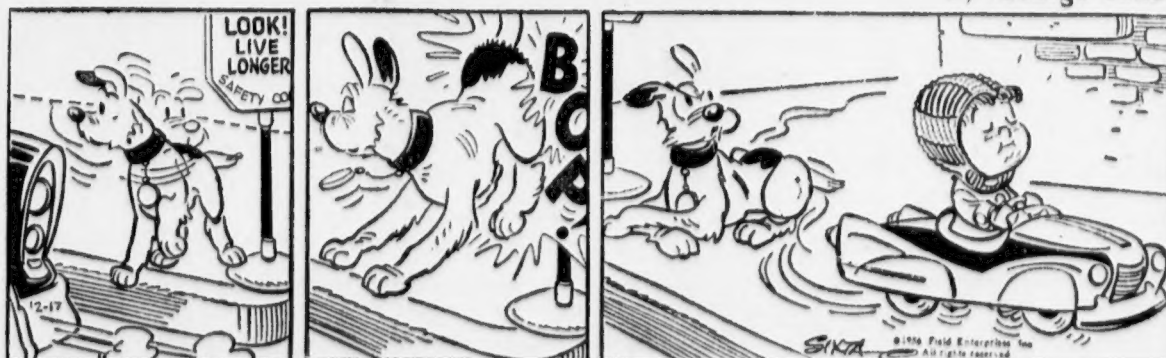

efficiently, develops agility and creates a physical toughness, it does not expose the body to serious injuries, as does boxing.

Brazil is the largest country of South America.

RIVETS

By George Sixta

Traffic offenders

There is a growing feeling that anyone convicted of handling a car under the influence of liquor should have his driving licence suspended for a period, which is often done now, and his car impounded, which is rarely done now. If he is caught driving while his licence is under suspension, a jail sentence might be made mandatory. —The Advocate, Red Deer, Alta.

End brakeman to head end trainman

OTTAWA.—Around newspaper circles here in Ottawa they are calling it the Royal Commission on Featherbedding. It is not really a gay affair; it is a serious matter to Canadians in all parts of the country. This is the famous hearing that rose out of the nine-day railway strike called by the Brotherhood of Firemen and Enginemen in January, a special commission made up entirely of judges and headed by Mr. Justice Roy Kellock of the Supreme Court of Canada. This is the hearing Prime Minister St. Laurent promised would be so impressive that public opinion would practically force both sides—the Brotherhood and the Canadian Pacific Railway—to accept the findings of the judges. The railway has already announced it would accept the judges' decision whatever it be; the union simply refuses to do so. In fact union officials have openly talked of the possibility of resuming the strike when the deadline rolls around in October—crop time.

If public opinion is going to have any effect on the union's decision it will need the facts, and here are some that have popped up in the first days of this special hearing.

Canadian railways are gradually switching over to diesel locomotives to increase their efficiency, save operating costs and keep the nation's freight rates from climbing right up out of sight. The CPR proposal to drop firemen from diesel locomotives in freight service and yard service will make it possible to save about \$11,500,000 in operating costs each year when the dieselization program is complete. This is about one-third of the company's revenue from hauling Western grain.

Diesels, of course, don't need firing. They fire themselves.

Even the Brotherhood admits this. Their lawyer David Lewis told the Commission that firemen were "understandably reluctant" to believe that they had become useless but said they were deeply concerned with the safe operations of trains.

This "safety factor" seems to be the main argument of the union. It was the one thing they hollered about during the strike. The picture they present, and it involves some grisly talk about accidents, is that of a fireman who doesn't stoke fires but spends most of his time helping the engineer to keep a look-out.

Covering this type of argument the railway counsel, Ian Sinclair told the judges:

1. Passenger trains are not even being considered in this proposal.
2. Freight trains already have an extra man to help keep a look-out. The head-end brakeman rides in the cab of freights for this purpose. (Presumably at present the firemen on a freight diesel is helping the brakeman to help the engineer to look-out.)
3. In yard service the locomotive move at very slow speeds and are controlled by signals of a ground crew, so there is no job here for a diesel fireman, not even as a safety look-out.

One point lawyer Sinclair has made clear. The fact that firemen are not needed on diesels, he says, is not the fireman's fault. "He has tried to find work to occupy his time. Today he may be trying harder than ever. He tries to keep busy. Firemen as a class on Canadian Pacific are and have been loyal members of the operating team—they would like to be able to earn their pay. Without any fault on the part of the fireman, the diesel has made him a fifth wheel—unnecessary to safe and efficient railway operation as the evidence will show."

He asked that the union be not allowed to block technological progress with make-work rules—"out-and-out featherbedding". "Unnecessary costs must be eliminated to protect the jobs of the large body of Canadian Pacific employees and to maintain Canadian Pacific as an efficient transportation agency."

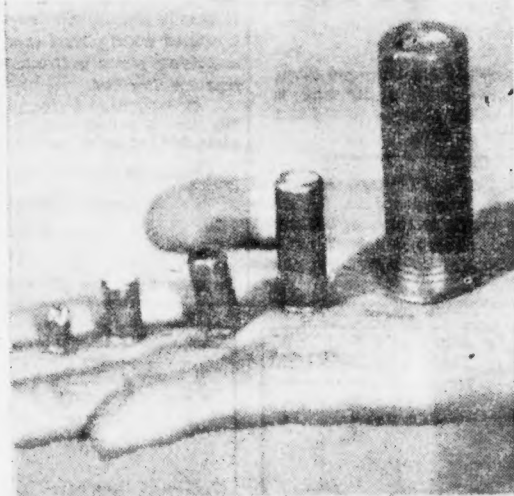

"Unnecessary costs", as one bystander noted, have a habit of turning up in the form of freight rates. And \$11,500,000 is quite a sum.

ALPHABETICAL ORDER

The flag of the member nations of the United Nations in New York are raised in alphabetical order.

FAROUK AND DAUGHTER—Ex-King Farouk of Egypt and his daughter, Princess Ferial, 19, arrive at the Russian Orthodox Cathedral, Cannes, France, for the wedding of Princess Marie-Louise of Bulgaria and Prince Karl Vladimír of Leiningen, Germany. It was Ferial's first appearance at a public function. Farouk permitted Ferial to go out dancing without a chaperone for the first time. She is the daughter of Ex-Queen Farida.

Half-hearted bullets

Blank cartridges are just fine for finishing villains' careers, once a night. But they have many other uses.

By Powell Smiley

Until Samuel Colt patented the revolver in 1835, playwrights resorted to all manner of lethal stratagems to get rid of their characters. Daggers probably were the favorite instrument.

By way of contrast, a recent personal survey revealed that between four o'clock one afternoon and 10 o'clock that evening, 117 shots were fired on Canadian television. That's a lot of gunplay, pardner, and considerably noisier than poison or a paper-knife.

It has been said that without firearms, the motion picture industry would never have survived. This is probably an exaggeration, but there is no doubt that the horse-operas, or Westerns, have always been among the most popular of cinematic productions. Who can imagine a Western without a six-gun?

But even an extra will shy away from risking his hide emoting amid a hail of live ammunition. And so we get the basic reason for the success of the Western—the blank cartridge.

A blank cartridge is made by putting the correct powder charge in an empty primed case, pressing in a top wad and crimping the mouth of the case, to hold the charge and wad in position.

For stage productions, a special revolver or pistol is used when the script calls for shooting off a couple of blanks. The gun has escape vents in the barrel, so that the gases created by the gunpowder will dissipate. Also, the plugged end of the barrel prevents the top wad leaving the barrel, thus preventing possible injury from a flying wad.

In actual fact, the stage absorbs only a small proportion of the blank cartridges made in Canada. C-I-L, for instance, manufactures several million rounds of blank ammunition a year, and yet not more than one in 10,000 of them ever finds its way into a legitimate play. A far greater proportion is used by starters in track and field meets, swimming races, and so forth.

A larger blank is used in getting yachts across the start line in regattas and other contests. This kind of starting gun is generally a 10- or 12-gauge shotgun, loaded with a shell which is filled with powder, closed with a wad then crimped. A shotgun is needed in these instances because the report from a smaller cartridge might not be heard over a large expanse of water, in competition with flapping jibs.

By far the largest user of Canadian "blanks" is the construction industry, where a power tool has been developed to speed up the forcing of studs into concrete walls, steel beams and other sur-

faces which cannot be easily penetrated by other means.

The armed services naturally make use of blank ammunition during training exercises. For the most part, these cartridges are of military calibre, fired from regulation rifles. A larger shotgun-type blank is used for salutes by the Royal Canadian Artillery. Smokeless powder, rather than the black variety, is used in all these cases.

Getting back to the stage, as opposed to the motion pictures, gunpowder has been used to heighten dramatic effect for over a century. Back in the 1850's, Boucicault's melodrama, "Life in Louisiana", had as its climax the actual blowing up of a steamboat on stage. A sort of super-climax was provided at one performance when the stagehand responsible for this effect underestimated the effect and almost blew up the theatre.

The simple fact is that blank ammunition must be used with the same care as live cartridges or shells. A nasty burn can be received from a paper wad fired at close quarters, and Thespians portraying murderers, peace officers and so on are always cautioned to make sure they do their shooting with the stage gun made for that purpose.

In certain types of plays, the firearm is even more important than the actors, as the manager of a traveling show found one evening in a small Maritimes town. He had exhausted his supply of blanks and decided that when the hero fired, everyone on stage should shout "Pow!" at once.

It seemed to work all right in rehearsal, but when the crucial moment came at the performance, "Pow!" seemed a pretty poor substitute, and the audience booed and hissed.

"I can't understand it", said the manager sadly to the hero, after the curtain had been quickly run down. "I know it wasn't a real shot, and you know it—but how did the audience find out?"

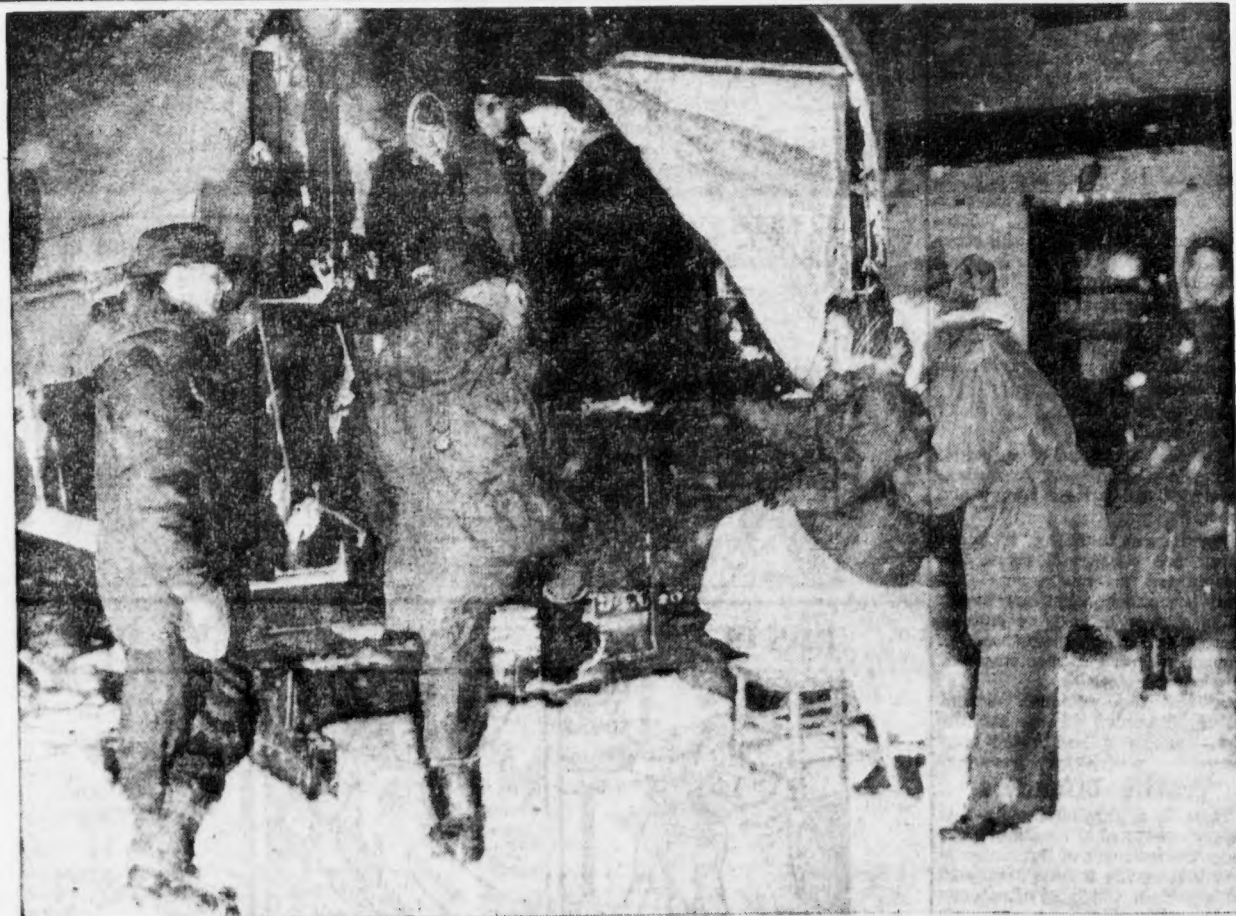

Farm Forum objects to trading stamps

Mr. and Mrs. Donald Ross entertained Kelvin Grove Farm Forum for the regular meeting on Monday with a good attendance.

None of our Forum members were in favour of accepting merchants' trading stamps for receiving premiums.—The Guide Advocate, Watford, Ont.—Feb. 15, 1957.

The ancients who originated the custom of placing flowers on graves believed that the dead enjoyed the fragrance of the blossoms.

A new bonanza

(The Progress, Winkler, Man.—Jan. 9, 1957)

Canada's new uranium industry looms as a high-ranking enterprise among the country's great mining projects.

The fact that this industry will employ some 12,000 persons with an annual payroll estimated at \$60,000,000 may surprise Canadians. Our uranium resources have been a military secret since uranium materials became important to atomic energy work following the Second World War.

Now that Canada's vast uranium reserves have been made public, there are indications that the uranium mining industry eventually will stand second only to gold mining, which in 1955 employed some 18,032 persons with a \$63,961,744 payroll.

This year, Canada is expected to produce its first uranium metal, from the crown-owned Eldorado Mining and Refining Ltd. plant at Port Hope, Ont.

So far, uranium mining has been concentrated in northern areas of Ontario and Saskatchewan and the Northwest Territories. But Canada's uranium reserves have been hardly touched.

The reserves are estimated at 225,000,000 tons. The uranium content of this ore is some 237,000 tons, which means Canada has enough uranium to meet domestic requirements for the next two decades.

Individuals urged to use labor pool now...

(The News, Maple Creek, Sask.—Jan. 31, 1957)

Large and small commercial establishments planning renovations or repairs to their offices, plants or stores in the near future can help the unemployment situation by doing them now.

Many firms in the past have begun alterations in the spring or summer when the demand for tradesmen and building materials is greatest—causing delay, inconvenience and added expense.

If firms planning alterations would start them now during the winter months, many otherwise unemployed workers would be assured of a job and the firms would be helping greatly to fight and counteract the annual hazard of winter unemployment.

Individuals can help too by making any repairs and renovations to their homes immediately instead of waiting until the Spring. Housewives can assist by hiring domestic help to aid with heavy chores.

An all-out attack on this problem would result in a considerable reduction in winter unemployment.

Speak softly, but carry a big stick...

(The Mail, Drumheller, Alta.—Jan. 30, 1957)

Man can be happy that good will has spread as much as it has in the world, but it isn't difficult to be somewhat gloomy about man's yester-years that produced the international passions and devastating weapons which loom threateningly.

However dark a picture is drawn, there is the reassuring knowledge that the human race has survived all previous eras of darkness and gloom and emerged into succeeding periods of enlightenment. That is because there is enough capacity for good deeds in the race to face any situation.

On The Side : By E. V. Durling

What United States naval commander said: "Don't give up the ship"? It was, of course, Capt. James Lawrence, commander of the USS Chesapeake, who voiced the aforementioned immortal words on June 1, 1813, in a battle with the British ship Shannon off the coast of Massachusetts. Capt. Lawrence's complete order was: "Keep the guns going! Fight her till she strikes or sinks! Don't give up the ship." These were the gallant commander's dying words. He was 32 years of age at the time.

CRIME DOESN'T PAY

Who was the meanest thief you ever heard of, One of the meanest, I think, was a man who confessed he had made a living for 48 years robbing church poor boxes, following his arrest in Chicago. Said he averaged \$20 a day. In Brooklyn, a man was arrested for stealing candy from a baby. He had snatched a lemon stick from the hand of the child. However, the tops in mean crooks was the man in St. Louis who was arrested for robbing the cup of a blind man.

A "POWERFUL" PREVENTIVE MEASURE

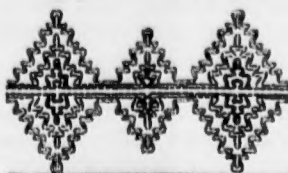

Garlic is said to be a very effective preventive for the common cold. It is claimed if you take it regularly you will never have one. The idea is to chop it up fine, make it into bread pills and take one pill with water daily two hours before breakfast. When garlic is taken this way it has no effect on the breath.

SCOTCH ARE AGAINST IT

"Scotch and soda" is an English idea. The Scotch are against it because they claim it injures the whisky. A Scot favors taking his whisky straight with a drink of water following it down. The Irish originated both the kilt and the bagpipes, I note it stated. That's wrong. The Romans originated the kilt, while Chinese originated the bagpipe. However, the Irish had both the kilt and the bagpipe before the Scots.

Fashions

Needle favorite

7307

by Alice Brooks

Swedish weaving—a handicraft favorite—it's so easy, fascinating to do! Seven different designs in this pattern—add color to pillows, aprons, towels, baby bibs!

Pattern 7307. Charts, directions for 2 baby motifs; 5 borders that can be used in variety of widths.

Send forty cents (40c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Two FREE Patterns—printed in our ALICE BROOKS Needlecraft book—stunning designs for yourself, for your home—just for you, our readers! Dozens of other designs to order—all easy, fascinating hand-work! Send 25 cents for your copy of this wonderful book right away!

VOLCANO TRAGEDY

One of the world's worst volcano tragedies was the frightful eruption of Mount Pelee in Martinique in 1902. Some 28,000 persons were killed.

Soft-shelled turtles are able to remain under water for hours, "breathing" by a special process of their pharynx.

WEEKLY BIBLE COMMENT

COMFORT WE GET IN TIME OF TRIAL WAS DENIED CHRIST

Jesus went into the Garden of Gethsemane to pray as He approached his impending fate. With Him He had taken James, Peter and John, the strong and impulsive disciples who were most capable of trust. He had told them to sit in the garden while He went further on to pray.

He told them of His great sorrow and of His impending death, and asked them to remain and watch with Him.

It was the human Christ, craving human sympathy and human companionship in the hour of His great trial. But there was that in His soul which no one could share. So He went forward a little and poured out an agonizing petition that the cup of suffering and final agony might pass from Him.

He came back to His disciples and found them asleep. He said to Peter, "What, could ye not watch with Me one hour?" He prayed a second time, returned to the three and again they were sleeping. In His deep loneliness, Christ returned once more to prayer and found that courage and confidence had come back to Him.

There was just a gentle reproach for his disciples now: "Arise, let us be going; behold, he is at hand that betrayeth Me."

Cannot hard-pressed souls take great comfort from this story? Often we reproach ourselves that our flesh is weak. We feel our weakness. We are conscious of our great cowardice in a trying period of life. We wonder that we have not the strength of will and the courage to enable us to triumph over every danger, to meet willingly every sacrifice.

But Christ Himself, with all the purity, beauty and strength of His earthly life, was so anguished that it was only through the thrice-repeated prayer that He was able to find the courage to meet His fate.

Three men bag twenty coyotes with hounds

Three district men, Mr. Vern Stewart, Mr. Eugene Sauve, and Mr. Roy Sargeant, have bagged 70 coyotes this winter with their 15 coyote hounds.

Coyotes have been particularly bad in the district east of Rimbey this winter, and to see groups of five and six is not uncommon.—The Recorder, Rimbey, Alta.—Feb. 14, 1957.

HOUSE TREE—Charles Heitzler likes this tree so well that he couldn't bear to part with it when he built a new wing on his home. The two-foot trunk of the towering tree comes right through the roof of the addition.

The squid discharges a thick inky fluid when attacked by other fish.

Now Many Wear FALSE TEETH With More Comfort

FASTEETH, a pleasant alkaline (non-acid) powder, holds false teeth more firmly. To eat and talk in more comfort, just sprinkle a little **FASTEETH** on your plates. No gummy, gooey, pasty taste or feeling. Checks "plate odor" (denture breath). Get **FASTEETH** at any drug counter.

ITCH STOPPED IN A JIFFY or money back

Very first use of soothing, cooling liquid **D.D.D. Prescription** positively relieves raw red itch—caused by eczema, rashes, scalp irritation, chafing—other itchy troubles. Greaseless, stainless. 39¢ trial bottle must satisfy or money back. Don't suffer. Ask your druggist for **D.D.D. PRESCRIPTION**.

BLACKHEADS

Don't squeeze blackheads and leave ugly scars—dissolve them with **PEROXINE POWDER**. Simple—Safe—Sure. Cleanses the pores deep down, giving your skin vitality and charm. At your Druggist. Results guaranteed. Price

PEROXINE POWDER

SLEEP TO-NITE

SEDICIN tablets taken according to directions is a safe way to induce sleep or quiet the nerves when tense. \$1.00 All Drug Stores or Adams Ltd., Toronto 5.

Jane Ashley Says

"Corn Starch Makes Tasty Entrées!"

SCALLOPED FISH

3 tablespoons MAZOLA Salad Oil
2 tablespoons finely chopped onion
2 tablespoons BENSON'S or CANADA Corn Starch
1 teaspoon salt
1 teaspoon sugar
2 cups tomato juice
1 bay leaf
2 medium onions, sliced
2 pounds fillets (cod, halibut or haddock)

PLACE MAZOLA Salad Oil and chopped onion in small saucepan.
COOK slowly about 3 minutes or until tender but not browned.
REMOVE from heat; stir in BENSON'S or CANADA Corn Starch, salt and sugar blending well.
ADD tomato juice gradually then bay leaf; mix well.
COOK over medium heat until thickened and boiling; stir constantly.
BOIL 1 minute then remove from heat; keep sauce hot.
COOK sliced onions in small amount of water; drain and place on bottom of 1 1/2-quart greased casserole.
WIPE fillets with damp cloth; cut into servings.
PLACE on top of onions; pour tomato sauce over mixture.
BAKE in hot (500°F.) oven for 10 minutes or until cooked.
YIELD: 6 servings.

D.A.'s CORNER

BY S. W.

PETTEM, D.A.

DRUMHELLER

PRESERVE THAT SOIL

Many of you have read of the drought which seems to be expanding in the United States. Indications are that another cycle of dry years has developed. Although it has not hit this area, it has been noted that dust has blown off of quite a few summerfallowed fields this winter. With the last few years being relatively moist, many precautions against soil

drifting have been lessened and in some cases neglected.

One of the best guards against erosion of our land by wind or water is a protective covering. The trash cover (residue of previous crop) should not be burned after the winter protection has been provided. This trash cover should be kept near the surface and can be readily incorporated into the soil and will continue to protect the soil from erosion. This residue will break down and as it decomposes, it makes available plant foods for the growing crops. Do not burn the stubble and straw in the spring. This procedure eliminates the protection from ero-

sion and destroys the organic matter which will provide plant food. In addition the intake moisture capacity of a soil is governed by the organic matter content. This factor is important in preventing water holes developing.

There are a number of problems with handling of a heavy trash cover. After the incorporation of large amounts of straw, a depressed yield will result. This is caused by a lack of nitrogen in the growing crops at the time this straw is breaking down. After the straw is decomposed there is more nitrogen available than if no straw had been incorporated. This problem of depressing yields with heavy incorporation of straw can be handled by using commercial fertilizer, the amounts and type of fertilizer depending on the farm and its particular soil characteristics. Use all methods possible to incorporate this trash, as burning it off is only a stop-gap procedure because with a continued burning, the organic matter and the bacterial life in the soil becomes lessened each year. With this lessened amount it becomes more and more difficult to incorporate any crop residue, while if it is incorporated each year and the soil builds up, it is easier to incorporate and have a complete break down of the straw which in turn provides plant food.

CANCER FACTS & FIGURES WHAT IS CANCER?

Cancer is the disorganized, unregulated growth of body cells. Although a great deal has been discovered about the nature of this growth, the cause is unknown.

Cancer cells can be destroyed by radiation or removed from the body by surgery. If treatment is begun early there is often a good chance of cure.

Although certain chemical compounds and hormones have been found to be of use in the control of tumor growth, radiation or surgery or a combination of the two are the only fully effective treatments for cancer.

CANCER'S TOLL

Last year cancer killed more than 20,000 Canadians.

This is an average of almost 55 persons per day.

More than two Canadians every hour of the day and night died of cancer.

More than 6,500 of the cancer casualties were people under 60 years of age.

More than 400 were children under 15 years of age.

Cancer killed more children between the ages of 5 and 14 than any other disease.

More women between the ages of 25 and 54 died from cancer than from any other cause.

Annually Canada loses more than 55,000 man years of labour due to cancer. This is based on the assumption that each worker killed by cancer would otherwise have been a member of the labor force until the age of 65.

Slightly more men than women die of cancer each year. The ratio is about 52 to 48.

Almost twice as many men die of stomach cancer as do women.

Almost five times as many men as women die of cancer of the lung and respiratory tract.

Cancer of the breast accounts for more than one-sixth of the cancer deaths in women (more than 1700 last year).

Between 1941-1954 the Canadian cancer death rate for men rose 10.5% from 119.6 per 100,000 of population to 130.9.

During the same period the death rate for women decreased 5.2% from 122.5 per 100,000 to 116.7.

There has been a significant decrease in male mortality from cancer of the mouth.

CANCER CRUSADE UNDERWAY

A call to join forces against mankind's cruellest enemy is being sounded throughout Alberta this week as the Canadian Cancer Society's annual educational and fund-raising cru-

AUDITORIUM PROGRAM

DEDICATION WEEK

APRIL 28—MAY 4th

Programs to appeal to every taste have been arranged for presentation in the Southern Alberta Jubilee Auditorium, Calgary, during Dedication week through the co-operation of the Calgary Allied Arts Council.

SUNDAY April 28th OFFICIAL OPENING

Two free tickets per application to the maximum number allotted for each district may be obtained by writing:

SUNDAY TICKETS, Public Relations Officer, Legislative Building, Edmonton.

Free tickets are for the Sunday Dedication Program only.

PLAN NOW TO ATTEND ONE OR MORE OF THESE OUTSTANDING PERFORMANCES

MONDAY April 29th CHORAL NIGHT

Calgary Choral Groups with featured dancing by David Adams and Lois Smith—Canada's Premiere Ballet Artists.

Evening—8 p.m.

MONDAY April 29th ETHNIC DAY

GOYA and MATTEO—"A World of Dancing".

"Parade of Nations".

Matinee 2:00 p.m.

Evening 8:00 p.m.

WEDNESDAY May 1st DRAMA & MUSIC DAY

Matinee 2:00 p.m. Norma Piper—Guest Vocalist.

Coaldale Little Theatre—Lethbridge Little Theatre.

Evening 8:00 p.m. Betty Jean Hagen—Guest Violinist with the Calgary Philharmonic Orchestra directed by Henry Plukker.

THURSDAY May 2nd BALLET & DRAMA DAY

Matinee 2 p.m. Lois SMITH & David ADAMS—Ballet Artists. Calgary Junior Ballet Corps—Joy Camden's "Canadian Ballet School".

Evening 8:00 p.m.

"As You Like It"—Calgary Drama League directed by Clarence Newcomb.

FRIDAY May 3rd REVUE DAY

Matinee 2 p.m. Jack Carson—Connie Towers—Wiere Brothers. "Patience"—Western Canada Light Opera Company—directed by Mrs. Bessie Gibb.

Evening 8 p.m. Jack Carson—Connie Towers—Wiere Brothers Light Classical Program—Robert Gibb. Calgary Chorus and Orchestra—Trudy Carlyle—"Choral Belles".

SATURDAY May 4th JUBILEE DAY

Matinee 2:00 p.m. "A Midsummer Night's Dream" Calgary Junior Theatre.

Calgary Junior Ballet Corps—Mount Royal Symphony.

Evening 8 p.m. Jack Carson—Connie Towers—Wiere Brothers. Junior League "Rockettes"—Trampoline Act—Barber Shop Chorus.

TICKET SALES

Ticket Sale opens April 1. Box Office open 10 a.m. to 5:15 p.m. daily except Sunday.

Ticket Prices

Matinee Performances—No Reserved Seats. Children 50¢; Adults \$1.00.

Evening Performances—All Seats Reserved, \$1.00 \$1.50 \$2.00

Coste House Box Office,

Heintzman's Music Store
